Solar

SOLAR POWER MADE AESTHETIC

The **CARPORT SOLAR** is an innovative product based on use of natural renewable source - the sun. It is a suitable shelter for cars, protecting your car, bicycles, quad bikes scooters or other parked equipment. The structure is designed to fully comply with both technical standards and aesthetic design of modern architecture. **CARPORT SOLAR** is a simple and elegant solution, suitable for any climate zone. The strong, solid structure with good anchorage can withstand strong wind gusts. Your car will be well protected in all seasons and weather conditions and with CARPORT SOLAR you will get an additional area for a solar power plant. It can also serve as an efficient and representative option for in car showrooms, can serve as a hotel parking or company cars parking.

CARPORT SOLAR SINGLE

1 CAR - 6% ROOF SLOPE, 3258 x 5290 x 2425/2980 mm

This solar carport will be especially appreciated by lovers of smaller cars and quick parking. It is unpretentious space-saving and it also fits easily into narrow gaps between houses.

9pcs of SOLAR PANELS USED

Carport output:	3,33 kWp
Solar panel type:	monocrystalline, all-glass
light transmission	12%
Emissions saving CO ₂ ~	1650 kg/year

Snow load from: 210 kg/m²
Wind load to: 100km/h

CARPORT SOLAR DOUBLE

2 CARS - 6% ROOF SLOPE, 5420 x 5290 x 2425/2980 mm
